Subject: RE: Summary from 7:45 FEMA brief at the SEOC
Date: Saturday, September 9, 2017 8:25:02 AM

FYSA

- C-130s are scheduled to begin spray ops after sunset today. They will make a dry run in the late afternoon to make sure all the GPS and locators are working, then spray after dark. They will be flying at 300 feet.
- Pesticides should be at Kelly AFB by 1000 today for for the Vector spraying.
- Private water well sampling: ESF-8 will probably be taking the lead, and Jeremy said FEMA will add it to a MA, ***IE***, and only ***IE*** there is a request from the State to do the private water well sampling.
- We are staying at the SEOC
